Mx video player apps apk

MX Player's latest APK 1.32.5 (1310001305) is one of the best multimedia applications for Android. The app has a function to enable video files to play seamlessly on smartphones and tablets. This is a recommended application that can support media players especially video and audio formats. It can be very simple and difficult at the same time. Free features are provided along with advertisements. However, there are pro versions that can be downloaded to go without ads. The pro version is not free. MX Player File Information Last updated: January 10, 2021 Developer: J2 Interactive Version: 1.32.5 (1310001305) Requirements: Android 4.0 and file size: 39.5 MB Uploaded: January 10, 2021 at 11:07AM GMT+07 MD5: 73068b6806db6fe49b28b02ec5d4c727 SHA1:03f306f18180ce9ad52c5f889abe3229ab0af89 Available on Google Play: Install from google Play MX Player app review In terms of interface, this will always allow you to watch in full-screen mode. The MX Player interface for Android is also very simple and pleasant with intuitive playback controls. The quality of the interface is really important because it will affect the watching experience. The app almost supports all kinds of popular codec and video formats that you like to play. They are AVI, FLV, DIVX, MKV, MP4, MPEG, MOV, WEBM, XVID, WMV and more. If you're going to play a file that the app doesn't support the format, it will fix the issue by warning you to install additional and free codec packs. In addition to video formats and codecs, it also supports excellent features for subtitle. Besides it maintains a large subtitle track, text coloring or text styling, it can also handle more than a dozen types of subtitle formats. Supported subtitle formats are SMI, SRT, IDX, MPL, TXT, SUB, SSA, and more. Another interesting feature of this application is gestures. Gestures can be performed to move text on the screen, zoom text, skip, backward or forward when it is not properly synced with the video. A setback of this app is the excitement of the playlist feature. This may seem a problem if you like watching more than videos in one day and leave videos running when you do other tasks like driving or working. Well, at least you need to know some of the pros and cons of this app. How to use the interface is very similar in the smartphone or tablet version. It only takes one pipe or one swipe down from the top edge of the screen to appear a notification or navigation bar. Other design aspects of the app include a lock button designed to avoid pipes and undeterred swipe, various viewing sets that can change the mode from stretch to 100% fitting the screen, and a forced rotation for the appropriate screen settings of your Android system. The application's file server is really smooth and clean. It also has auto-refresh when you or add more files than your smartphone or tablet. Would you prefer a sideloading app instead of regular Play Store installation? If you are a person who has yes to both of the questions given above and you want to download the MXPlayer APK, you have landed in the right place. I'll give you the APK file here. Are you willing to get it? Here you go! Download MX Player Latest Version VersiMX Player v.1.33.2 Size 40.83 MB System NeedsAndroid 5 and UpDeveloperJ2 Interactive If for any reason the above link does not work, please download the APK version of Player MX from the official website. I hope you know how to fool the application using the correct APK files. After loading down the file, go to Settings > Security, and then semak unknown sources. Finally, open the file to install the application. There you go! Hey, don't forget you can also download the pro version of MX Player from our website. You can also check How to Install MX Player on Firestick and MX Player Download for Windows 10/8/8.1 PCs. Characteristics of MX Player Now that you get what you want, let's look at the characteristics of this eringle application. Here are the incredible traits of our beloved media players. The shrinking of your gadgets can speed up your smartphone tools for better performance. This app offers a different media encoder to allow you to perform better. The driver has added a typical coding engine called HW+, using your smartphone to play video files with maximum capacity. No, it's not going to create any issues. If your media files have a reduced amount, you can turn on the SW referrer to have them If you don't have audio problems on the app while watching a movie, please download the MX Player custom codec from here. Different Gesture Support This media player supports various gestures to make use easier. You can pinch to zoom in and get out. Additionally, you can slide over the screen to skip the video. There are plenty of simple gestures like this for you to explore. Obviously, easy-to-use gestures improve access facilities. Subtitle support When we watch some foreign videos, subtitle is required. Not all mobile video players support subtitle. do not worry! MX Player has subtitle support. It supports almost all subtitle formats. You can put subtitle files into the same directory as video files to make them activated. Additionally, there is an option for you to download the right subtitles from the web as well. It's up to you whether to go with local subtitles or download one directly from the app interface. The best thing about subtitle this application is gestures. Yes, subtitle gestures are also available. You can move text, increase the font size and color. From all, you can skip subtitle text as well. Kid locks If you have a child, you know how difficult it is for you to watch videos without interruption. Most likely, they will try to touch the screen. If you enable the children's key facility available on the app, you don't need to open the file again or set the correct position to watch from where you stopped. The children's lock facility will be deactivated only when you touch a specific part of the screen. Since your toddler doesn't have a clue where to touch, you won't have any problems in continuing playback. FAQs About MX Players How to download the APK version of MXPlayer? Go to MXPlayer to get the APK to get the latest version. On any website, find the download button and click on it to download the file automatically. Once the download is complete, click on the downloaded file to install. Where to download the official version of MX Player? You can get MXPlayer here for the latest official version.
